

## ➤ GET-100 Gigabit Ethernet Tester

GET-100 is a handheld 10M/100M/1000M gigabit Ethernet tester, used for the Ethernet installation, operation and maintenance services.

The GET - 100 design in a small and portable device which provides packet capture, network monitoring, network performance testing, data generation, test leads and error test functions in an organic whole unit. It is widely used in network layer 1/2/3 BER test and RFC - 2544 test. GET-100 help maintenance people to quickly locate fault and analysis network
