

応用

VF 610 Application

This compact instrument includes a 2Hz modulation feature to enhance the identification of problem areas. A 3V CR2 lithium battery powers the VF 610, providing more than 1000 operations. The VF 610-SC connector output allows direct connection to the fiber under test. The VF 610 may also be ordered with a 2.5mm universal adapter. The VF 610 includes a padded cordura carry case with belt loop. Fiber continuity on multimode or single-mode fiber is possible with the VF 610, up to a distance of 5 km.
