

# 1550 nm Select Cutoff Single-Mode Fibers

Nufern's 1550B-HP high-performance select cutoff bend insensitive single-mode fiber is optimized for use in small form factor active and passive components requiring tight bend radii. With a bend loss considerably lower than SMF-28™, 1550B-HP is ideal for the video leg in FTTH CWDM and applications such as smaller form factor C and L-band components and low NA planar waveguides.

## Typical Applications

- FTTx components and modules
- Compact C and L-band components
- Low NA planar waveguides
- Metro components

## Features & Benefits

- Optimized cutoff for 1550 nm wavelength — Extremely low bend loss
- Tight mechanical and optical tolerances — high yield component manufacturing
- Mode matched to SMF-28 — Low splice loss to standard fibers
- High proof test for tighter bends — Critical for long-term reliability in tight bend applications

## Optical Specifications
